Preface xiii

Boron-treated microalloyed quenched and tempered plates, their structure and properties
J. Adamczyk, W. Ozgowicz, R. Wusatowski, E. Kalinowska-Ozgowicz, R. Grzyb (Gliwice, Poland) 1

Estimation of machine parameters for hydraulic bulge forming of tubular components
M. Ahmed, M.S.J. Hashmi (Dublin, Ireland) 9

Determination and use of the forming limit stress surface of orthotropic sheets
R. Arrieux (Annecy, France) 25

Structural alterations in the surface layer during hard machining
A. Barbacki, M. Kawalec (Poznań, Poland) 33

Model of complex optimization of cutting conditions
F. Čuš (Maribor, Slovenia), M. Soković, J. Kopač (Ljubljana, Slovenia), J. Balič (Maribor, Slovenia) 41

Mechanically alloyed, ferritic oxide dispersion strengthened alloys: structure and properties
A. Czyrska-Filemonowicz, B. Dubiel (Kraków, Poland) 53

Thermodynamics of dissolution and liberation of gases in the atomization of molten metals by plasma-induced expansion
V. Dembovský (Ostrava, Czech Republic) 65

Adaptive systems for machining process monitoring and control
G.E. D'Errico (Orbassano, Italy) 75

Elsevier Science S.A.

Performance of ceramics in erosion tests by solid particle impingement
G.E. D'Errico, S. Bugliosi, D. Cuppini (Orbassano, Italy) 85

Structure and properties of W-Mo-V-Co 11-0-2-5 type and W-Mo-V 11-0-2 type high--speed steels
L.A. Dobrzański, W. Kasprzak, A. Zarychta, M. Ligarski, J. Mazurkiewicz (Gliwice, Poland) 93

Role of Ti in the W-Mo-V high-speed steels
L.A. Dobrzański, M. Ligarski (Gliwice, Poland) 101

Comparison of hardenability calculation methods of the heat-treatable constructional steels
L.A. Dobrzański, W. Sitek (Gliwice, Poland) 117

Influence of deformation parameters on microstructures of TiAl alloys
H. Garbacz, J. Mizera, J.W. Wyrzykowski (Warszawa, Poland) 127

Sinterability of carbide-nitride phases of titanium in high pressure conditions
T. Gibas, J. Walter, L. Jaworska, B. Królicka (Kraków, Poland) 133

High cycle fatigue of low alloy carbon steels
M. Gjonaj, M. Cukalla (Tirana, Albania) 141

Direct recycling of aluminium chips into extruded products
J.Z. Gronostajski, J.W. Kaczmar, H. Marciniak, A. Matuszak (Wrocław, Poland) 149

Model describing the flow stress of silicon bronzes below critical strains
Z.J. Gronostajski (Wrocław, Poland) 157

Application of a flow stress function in programmes for computer simulation of plastic working processes
F. Grosman (Katowice, Poland) 169

Group technology using neural nets
A. Gwiazda, R. Knosala (Gliwice, Poland) 181

High speed impact of elastic-plastic work hardening material into a rigid boundary
A.M.S. Hamouda, M.S.J. Hashmi (Dublin, Ireland) 189

Forging on the four-lever arms swaging machines
R. Hebdzyński, S. Kajzer, R. Kozik (Gliwice, Poland) 199

Studies of the $\alpha' \rightarrow \gamma$ transformation in Fe-(23-26)Ni-2Ti alloys containing an addition of aluminium or molybdenum
J. Jeleńkowski (Warszawa, Poland) 207

Orbital forming of an oxygen cylinder web
E. Kalinowska-Ozgowicz, W. Krukiewicz, L. Kowalski, R. Kozik, J. Rabus, J.G. Szota (Gliwice, Poland) 215

The effect of the twin boundaries on the yield stress of a material
K. Konopka, J.W. Wyrzykowski (Warszawa, Poland) 223

The mechanical instability of the metal substructure and formation of pseudo-periodic substructure in thermodynamically stable and unstable phases
A. Korbel, F. Ciura (Kraków, Poland) 231

Wear properties of T15 PM HSS made indexable inserts after laser surface melting
J. Kusiński, A. Ciaś, T.M. Pieczonka (Kraków, Poland), A.B. Smith (Loughbrough, United Kingdom), A. Rakowska (Kraków, Poland) 239

Phase transformations and mechanical properties of steels containing 0.6% C, 0.7-1.4% Mn and microalloyed with V and Ti
H. Leda (Poznań, Poland) 247

Advanced ultra-low carbon bainitic steels with high toughness
A.K. Lis, J. Lis, L. Jeziorski (Częstochowa, Poland) 255

The numerical micro/macro model of solidification process
E. Majchrzak, A. Piasecka (Gliwice, Poland) 267

Effects of mass growing on mechanical and hygrothermic response of three-dimensional bodies
C. Majorana, V. Salomoni, S. Secchi (Padova, Italy) 277

Physical metallurgy characteristics of the M/A constituent formation in granular bainite
E. Mazancová, K. Mazanec (Ostrava, Czech Republic) 287

Modelling of Fe-C alloys solidification using the artificial heat source method
B. Mochnacki (Częstochowa, Poland), E. Majchrzak (Gliwice, Poland), E. Pawlak (Częstochowa, Poland), J. Suchy (Opole, Poland) 293

Heterogeneity of strengthening of the thick-walled copper square tubes in a process of rolling in a four-roll pass
T. Oczkowicz, S. Tkaczyk (Gliwice, Poland) 303

The effect of manganese and silicon on the kinetics of phase transformations during tempering – Continuous Heating Transformation (CHT) curves
J. Pacyna, A. Jędrzejewska-Strach, M. Strach (Kraków, Poland) 311

The method of the knowledge representation in an expert system for metal cutting engineering
A. Paszek, R. Knosala (Gliwice, Poland) 319

Dilatometric study of solid state sintering of austenitic stainless steel
T. Pieczonka, J. Kazior (Kraków, Poland), A. Tiziani (Padova, Italy), A. Molinari (Trento, Italy) 327

Mechanical properties of Al-$NbAl_3$ *in situ* composites
M.H. Robert (Campinas, Brazil), S.L. Urtiga Filho (Recife, Brazil) 335

Compatibility effects at the phase interfaces in duplex steel (α/γ) bicrystals
J. Ryś (Kraków, Poland) 343

Hobbing as finishing machining of the hard teeth
Z. Stachurski, H. Słupik (Gliwice, Poland) 353

Applications and potential of thermoelastic stress analysis
P. Stanley (Manchester, United Kingdom) 359

Influence of passivation process on the corrosion resistance of amorphous tapes
D. Szewieczek, J. Tyrlik-Held, Z. Paszenda (Gliwice, Poland), A. Zymla (Chatenay Malabry, France) 371

Analysis of a tension-driven outside-in tube inversion
L. Tomesani (Bologna, Italy) 379

P/M high speed steels obtained by metal injection moulding
J.M. Torralba, J.M. Ruiz-Román, L.E.G. Cambronero, J.M. Ruiz-Prieto (Madrid, Spain), M. Gutiérrez-Stampa (San Sebastián, Spain) 387

The influence of heat treatments on the microstructure of 9% chromium steels containing tungsten
A. Zielińska-Lipiec, A. Czyrska-Filemonowicz (Kraków, Poland), P.J. Ennis (Jülich, Germany), O. Wachter (Hannover, Germany) 397

Application of temperature resistivity change method for kinetics studies of crystallization in amorphous $Ni_{81}P_{19}$ alloy
K. Ziewiec, Z. Kędzierski, T. Stobiecki, E. Tasak (Kraków, Poland) 407

Author Index of Volume 64 417

The publisher encourages the submission of articles in electronic form thus saving time , avoiding rekeying errors.
A leaflet descriging our requirements is available from the publisher upon request.
